

MEETING MINUTES

WED APRIL 23rd: 12:30-1:45pm

- Ran a mock environment test using the Raspberry Pi camera with tennis balls
- Discussed challenges with the Raspberry Pi camera being too "zoomed in" and producing shaky footage
 - o agreed to reposition the camera higher to better capture the full mock environment
 - o decided to redesign the Raspberry Pi camera holder since the current design contributed to the shakiness & is slightly too small

THU APRIL 24th: 8:35-10:40pm

- worked on Sprint planning presentation slides and rehearsed talking points
- updated sprint taskboard on GitHub for Sprint 4
- completed and recorded one presentation round
- discussed encoding algorithms for Rasp Pi
