

MEETING MINUTES

MON SEPT 29th: 9:30-10:45am

- Began planning our Sprint 2 presentation
- Updated Github sprint board
 - Moved any unfinished sprints from previous sprint board to current sprint board

TUE SEPT 30th: 3:30-4:30pm

- Each member of the team made contributions and proposed solutions to our client improve chick counting accuracy
 - Jason: better training data and camera positioning for both models, with additional camera quality evaluation for RGB camera
 - Anye: pipeline like JJ's temperature segmentation, but focused on RGB values, to compare and potentially integrate with bounding-box data from the RGB model
 - Logan: statistic modeling for the noticed consistent undercounting of RGB YOLO processing from true count data
 - JJ: chick segmentation using temperature values derived from the thermal model, training with SVM
- Client agreed to have us assigned to work on our solutions for the upcoming weeks

TUE SEPT 30th: 5:00-5:40pm

- Finalized sprint 2 presentation and speaking roles
- Added new tasks and assigned to each member in current sprint board

WED OCT 1st: 9:30-10:45am

- Presented sprint 1 evaluation / sprint 2 planning to other teams
