

MEETING MINUTES

Friday Feb. 28st, 6:03pm-7:56 pm

SUMMARY: FEB. 28st

- Footage review: Analyzed footage for best over all way to identify the chicks for model training. Identified color values for the chicks within the videos to gain a range of values for model training.
- Model Decisions: Decided to go with blob detection with size-based parameters as well as color recognition.
- Model Testing: We discussed ways to be able to test our model's accuracy in identification before getting more footage from Perdue.
- Hardware: Finalized our selection of cameras. Finalized selection on placement of cameras, barring any unforeseen complications encountered at Perdue.
