

**Week 10 Meeting Minutes**  
**COSC426 - Chick Counting Group**  
**November 16th, 2025**

### **Monday 11/10**

On Monday, the team discussed individual improvements over the weekend. JJ brought up progress in interpreting overlapping bounding boxes, as well as introducing potential significance of IoU parameter for YOLO model inference. Logan mentioned progress and began implementing that variable into analysis of meta-models. Jason discussed limitations in labeling data and discussed with Logan best ways moving forward for training neural networks.

### **Tuesday 11/11**

On Tuesday, the team met with the client, Dr. Wang. In this, all recent progress was discussed with the client. Requests for further polishing were made, as well as an identification of the time in the semester. He then went on to identify the new need to prioritize concatenating or merging our individual works for a final proposal.

### **Wednesday 11/12**

On Wednesday, the team met again and discussed approaches that can be used to move forward in merging our progresses into a final direction. The team also discussed the approach for completion of the upcoming Sprint presentation, as well as identifying long term plans for the last few weeks of the semester.
