MEETING MINUTES

Monday, Oct 6th: 9:30-10:45am

- Repository cleaning and restructuring
- Coordinating completed work up to this point, preparing for the next phase of this project.

Tuesday, Oct 7th: 3:00-4:00pm

- Anye presented progress made in various function development for meta-model implementation.
- JJ spoke about his completion of his pipeline for bounding box data extraction.
- Logan spoke about the finalized documentation for the current model validation approaches.
- Significant time was spent by the team members and the client brainstorming potential methods of training, evaluating, and building features for meta-model implementation.

Wednesday, Oct 8th: 9:30-10:45am

- Discussed, in-depth, our best approaches for designing an outer-loop for training of the meta-model.
- Discussed also how we should best split up data for outer-loop validation.
